ABSTRACTED-PUB-NO: RU 2078561C

BASIC-ABSTRACT:

Face-cream composition which is effective in preventing cosmetic signs associated with ageing by single daily application can be obtained by including a protease-containing preparation as the active component. The cream has the following formulation (wt.%): hydrogenated cottonseed oil (25-27); olive oil (12-17); lanolin hydrolysis product (6-8); glycerine (6-8); zinc oxide (2-3); alpha -tocopherol (0.1-0.2); sodium benzoate (1-2); pancreatin (0.1- 0.2); hyaluronic acid (0.5-1.0); fragrance (1.0-1.5); and water (balance).

USE - The product is useful in the cosmetics industry, as an anti-ageing face-cream.

ADVANTAGE - Enzymatic effects are prolonged, application frequency reduced from 3-4 times to once daily and side-effects eliminated.
